

# Air Filter Regulator Type AFR100

## Description

The AFR 100 is designed to deliver a constant pressure for pneumatic regulator or for all control instruments and pneumatic equipments.

## Characteristics

- Aluminium Body
- Protection by antiacid paint, to be used in corrosive atmospheres
- Diaphragm : Nylon reinforced Bunan
- Adjustment screw : steel zincplated
- Filter : stainless steel
- Drain plug : brass
- Output manometer : 0 to 7 bar

## How to order

Prière de mentionner la référence AFR Indicate the reference AFR 100 as much as the upstream and downstream pressure.

## Certification

ATEX II 2 G/D/ISO 9001 version 2008

## Technical data

- Maximum input pressure : 17 bar g
- Outlet range : 0 to 7 bar
- Connections : 1/4 " NPT – F
- Ambient and storage temperature : -30 to +70°C
- Filter : 8 microns
- Sensivity : sensivity to charge smaller than 5 mm CW
- Weight : 0,650 kg

## Dimensions
